

The image features a blue-toned background with a grid pattern. A prominent diagonal band of a darker blue shade runs from the top-left towards the bottom-right. Scattered throughout are various hexagonal shapes, some solid and some outlined. At the bottom, a white line graph with several peaks and valleys is visible. The company name is centered in the middle of the image.

OM SURGICAL COMPANY

BI-PAP Mask

Product Description:

Leveraging on our in-depth industrial knowledge, we are betrothed in providing better quality collection of Bipap Mask. Superb quality materials and high-tech machines are utilized by our vendors' skilful professionals to manufacture the whole range of these masks. Our quality examiners thoroughly inspect these masks against diverse parameters of quality to ensure their excellence and optimum quality.

Features:

- Highly comfortable
- Soft texture
- Utmost quality

OM SURGICAL COMPANY

Philips Auto C-PAP

Performance

Our main objective is to provide performance for treatment efficacy. While Bipap AVAPS features clinically proven AVAPS (Average Volume Assured Pressure Support.) hybrid ventilation, both BiPAP S/T and BiPAP AVAPS come with the well-known Philips RespiroNics algorithm, Digital Auto-TRAK, to ensure optimised patient/ventilator synchronisation.

Simplicity

Small, light and quiet, the BiPAP S/T and BiPAP AVAPS have an intuitive interface to simplify access to the ventilation settings.

As both devices come with an expertly designed water chamber and Dry Box technology, water ingress problems are avoided.

OM SURGICAL COMPANY

Philips Bi-PAP-AVAPS & Humidifier

System One Humidity Control closely monitors room temperature, room humidity and flow to determine what is required to maintain the patient-selected humidity level-reducing rainout, even in changing environmental conditions.

Through a combination of our cleverly designed water chamber, plus the advanced new 'Dry Box' addition, the risk of water ingress into the device is virtually eliminated.
